GREAT AESTHETICS

Smart Home technology has become more & more a part of everyday life, with the ability to control your door from you phone, tablet or PC.

For Vertic-al Smart Home please see options pages 18-19.

PARKING MADE EASY

Somfy TaHoma is the easy to install home automation hub that makes controlling your house simple. With TaHoma you can open your blinds, switch off your lights or operate your garage doors all from your phone, tablet or PC.

somfy Building happiness

CLEVER CREATION

Innovative

Our Vertic-al doors allow you to park within millimeters of the garage door, thus saving space on your driveway.

Whilst vital space on the inside is not hindered, you are free to use the overhead space for storage, clear of any obstructions.

Vertic-al doors are typically installed behind the garage door opening, which increases drive through room width of up to 150mm which helps keep your wing mirrors free of damage.

Traditional garage doors typically swing out reducing the drive depth considerably.

Vertic-al roller garage doors are the perfect solution for those short driveways or garages that back straight onto the road or the main street.

VERTIC-AL

VERTIC-AL

SHUT OUT THE COLD

Feel The Warmth

Garages can be a cold & draughty place, Vertic-al insulated rollers garage doors are fabricated to provide thermal & acoustic insulation, designed to keep out the cold.

Vertic-al doors are the perfect choice when choosing an insulated garage door, which prevent the cold from penetrating into the garage and surrounding living spaces, especially useful for rooms situated directly above the garage.

The CFC-free polyurethane foam filled aluminium profile used in the Vertic-al range of insulated roller garage doors maximises the energy performance of the door to retain the heat.

Vertic-al guide frames are inclusive of draught excluding brushes to assist the door thus operating quietly and smoothly. A bottom rubber weather seal further enhances the thermal performance of the door.

A workshop, exercise room or playroom, the garage can be a great place to be with a Vertic-al insulated roller garage door, maintaining the room temperature.

A WARM PLACE

Somfy Rollixo RTS system warns against any attempt to force open the garage door via an integral audible alarm system. The panel also includes a push button control and a built on courtesy light

somfy Building happiness

FEEL SECURE

Somfy motors are available as an upgrade to the Vertical drive motor. Somfy motors operate at 17rpm compared to the vertical drive at 15rpm.

somfy® Building happiness

Box stiffener adds rigidity to the box cover.

Low level external release allows you to manually open the door in the event of a power failure, if your garage has no other access.

SAFE & SECURE

Protect Your Garage

Your garage is normally home to valuable items from cars, bikes, fitness equipment, tools and not forgetting that there is often an entrance door from the garage to your home.

A secure garage door is an absolute necessity to ensure all your valuables are safe. The optional Deprat locking devices are one of the most secure systems with steel reinforced locking straps to prevent the door from being forced up.

A Vertic-al insulated roller garage door will protect your home and is alarmed as standard. If an attempt is made to force up the door from the bottom, a sensor triggers a piercing 105dB alarm on the door panel, to deter any would-be intruders.

Vertic-al insulated roller doors are remote controlled as standard, and with no visible handle or locks to pick, its very difficult for unwanted visitors to gain entry into your garage.

VERTIC-AL

CLASSIC COLOURS-

Popular classic colour collection. A high grade powder coated satin finish.

COTSWOLD RANGE-

A fantastic collection of smooth powder coated shades all with a subtle satin finish.

LAMINATED FINISHES-

Textured colours provide an attractive yet subtle texture that also improves durability.

LAMINATE WOOD-

Attractive laminated wood finishes, with a subtle texture to provide authentic aesthetics.

SPOILT FOR CHOICE

Important: The colours shown here are for illustration purposes only and limited by the printing process. Please ensure you have seen a sample of your selected colour.

There may be a slight shade and sheen difference between the door curtain and the bottom slat and other parts of the door such as the guides and the door housing box, due to the different coating processes required for each element.

Over time some marking to the door curtain inside and out will occur in the course of operation. This is normal for all types of roller door.

GREAT THINGS COME
IN SMALL PACKAGES

Somfy smooove origin wall switches allows you to wirelessly control your connected Somfy products with the touch of a button and thanks to the neutral colour finish, this contemporary switch will blend seamlessly into your interiors.

VERTIC-AL COMPACT

Small & Compact

The Vertic-al compact insulated roller garage door has been created for garages with limited space above the opening.

With the use of a 52mm deep - 13.5mm thick profile, allowing for a tighter coil, thus requiring only 205mm of headroom, providing home owners with limited space the option of a great quality roller garage door, remote controlled as standard.

Extremely adaptable the Vertic-al compact insulated roller door can be installed in-front of, behind or within the garage opening.

With a wide range of sizes available upto 3000mm wide, with a neat 90 degree fascia to conceal the curtain, and an optional 45 degree fascia canopy to completely encase the head of the door and complete the overall appearance.

Vertic-al 77mm Profile

Vertic-al 52mm Profile

VERTIC-AL

SPECIFICATION

Door Detail

Auto-lock devices hold the door securely closed, with a felt surrounding the locking rings ensuring that it will have a smooth operation and minimise wear and tear.

Full box options are available, that protects the mechanism from the elements and ensures it will continue to look great year after year.

Most solid colours and many wood effect finishes are available for the box covers.

The powerful 240V tubular motor which is concealed inside the barrel system of the door, ensures fast and quiet operation, whilst the intelligent optical eye safety edge sensor situated in the bottom rubber detects and stops the door upon hitting an obstruction.

Doors weighing 20kg and above are inclusive of a safety brake which will hold the door in position if the tubular motor fails.

GREAT PERFORMANCE

GREAT VISION

Alphanumeric wireless keypad, surface mounted with anti-vandal capabilities. Battery powered, 2 channel, with push buttons and an illuminated back light. Can be mounted externally.

WINDOW SHUTTERS

Small Is Beautiful

Vertic-al micro is a stylish aluminium security shutter which is an effective solution to increase security on your home.

The Vertic-al micro can be installed internally or externally and is fabricated with either solid or vented profiles, to allow light to pass through when the shutter is partially open, which provides shade when it is a bright sunny day.

The Vertic-al micro can be controlled remotely by handset, wall switch or with Smart Home run routines, such as "leaving home" or the "sun is out" straight from your smartphone, tablet or PC.

The slim profile and high grade finish of our compact box section provides an uncluttered look which blends discretely with your home.

VERTIC-AL

SMART HOME OPTIONS

Convenience

Somfy Smart Home provides you with the ability to monitor and operate your garage doors, shutters, curtains, lights, heating and electrical equipment with your smart phone, tablet or PC giving you peace of mind and flexibility, wherever you are.

You can adapt the Somfy smart home system to suit your personal preferences, allowing you to keep a watchful eye on your home with motion detectors and cameras.

Somfy TaHoma hub is the heart of your smart home which links you to your home via the intelligent TaHoma app. Products can be added to suit your needs or budget and can be installed and operated with the greatest of ease.
